

New search facility to compare budget accommodation and hostels rates globally

Hotel rates comparison search engine [Comparior.com](#) has launched a new feature of searching for B&Bs, hostels, country houses, self-caterings worldwide, instead of just hotels.

In doing so, the company has increased its offer to over 220,000 properties.

[www.comparior.com](#) is free to use, independent, does not require registration nor applies commissions on the rates displayed.

"Our aim is to find all available online accommodation in the world, helping both leisure and business travellers to find and book their preferred property at the best rates in the market" said Alberto Unger, Comparior's Marketing and Communication Manager "Adding the Budget Accommodation and Hostels search facility we considerably increased the number of properties the traveller can compare and book online, from budget to traditional to luxury ones. We collaborate with major international online operators displaying over 200,000 hotels and 25,000 hostels worldwide."
